PVC Strip Curtains Brochure

DNA Products supply a vast range of high-quality, energy saving PVC stocks from standard grade PVC strip, freezer grade PVC strip, perforated, frosted, colours in both translucent and opaque, anti-static, anti-insect. Our strip curtain kits are made bespoke to your unique requirements ensuring you receive the most suitable PVC solution for your application.

When your freezer or cold room door is open, even for a small period of time, your cooling equipment will begin to work harder to counter act the loss or gain of temperature. However, install a set of our PVC strip curtains and you will minimize temperature loss / gain even further and save money on your running costs. They will start saving you money immediately.

So simple you could fit them yourself.

Our PVC Strip Curtains are long lengths of PVC which are fixed to a hanging rail. They form a vertical curtain and can be attached across the top of a doorway and are ideal for internal/external doors and personnel access. These PVC curtains are designed to stop insects and debris coming into the open doorway as well as maintaining control of the temperature.

These PVC Strip Curtains are a cost effective and easy to maintain replacement for doors in large areas like factory floors and warehouses. Before you purchase a PVC curtain it is important to think about the right thickness of PVC and how much of an overlap and fitting system is needed for your environment.

Find out more about the benefits and common applications to our PVC curtains below.

Energy Saving: Reduce your energy costs by up to 50%

Strip curtains create an effective barrier, allowing you to regulate the temperature in your environment effectively there is less need to heat & cool areas as a result.

Safety: Keeping your workers safe

Our crystal-clear PVC curtain strip doors ensure absolute visibility between areas allowing pedestrians and motorised vehicles to pass without endangering worker safety.

Durability: Ribbed PVC curtain strip can last up to 10% longer than flat PVC strip

PVC strips are extremely durable - our range is suitable for a variety of industries or applications, and they are manufactured in the UK to last in high traffic environments.

Hygienic: High-quality PVC strip doors reduce cross-contamination

A PVC strip door curtain is essential for contamination control. Installing a PVC strip curtain kit can stop pests, dust, or litter from entering your premises, improving the hygiene in the area.

Noise: Contain noise pollution in your workplace

Control noise in your workplace by installing strip curtains. Industrial curtains can be installed to ensure you comply with the 2005 Control of Noise at Work Regulations.

Ease of maintenance

PVC strip curtains are easy to maintain and keep clean, simply wipe down with warm water when they begin to look dirty. The strips are also easy to remove and replace during the change of seasons. We also offer a replacement service to assist with damaged PVC door strips.

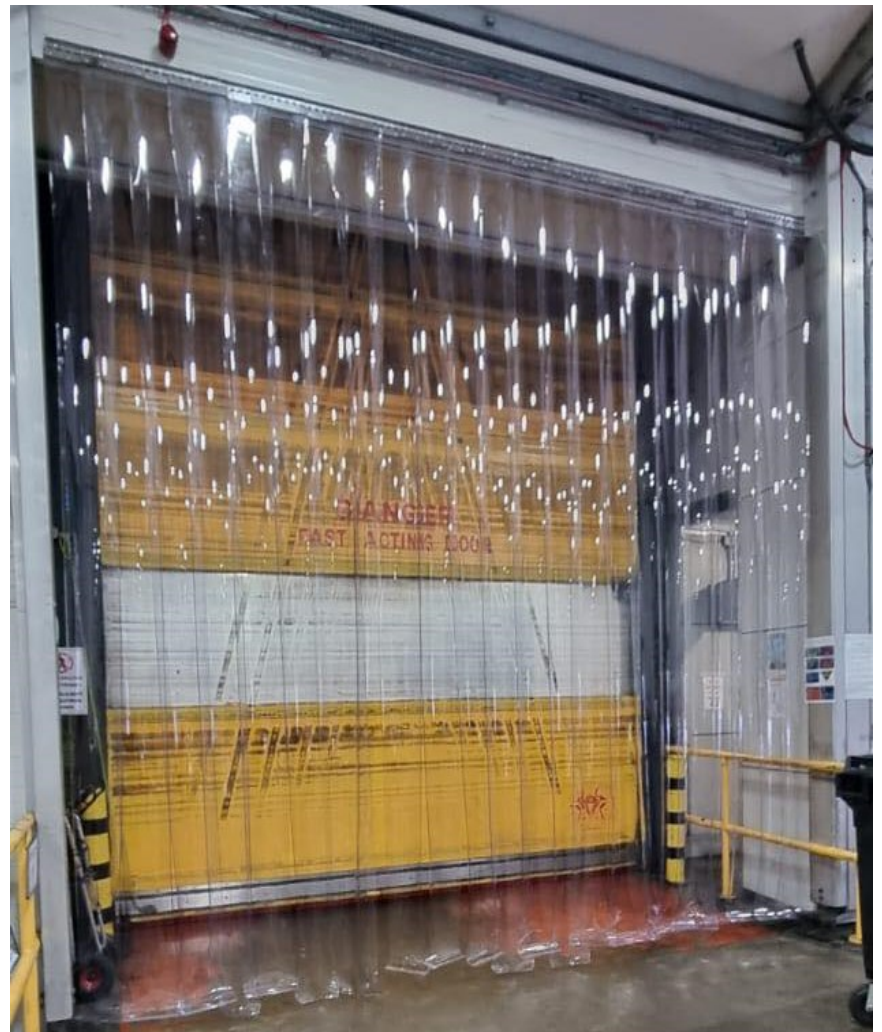

We can supply bespoke strip curtains to suit any openings and doors, from small, light-duty openings to heavy-duty industrial applications. Our made to measure PVC strip door curtains and screens are versatile, meaning that they can be installed into a wide selection of industries with a multitude of benefits.

MATERIALS

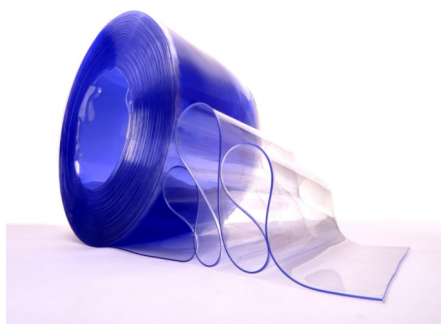

All of our Strip Curtains are made from Cadmium Free PVC.
