## PRODUCTS

## Meat Rail Doors Brochure

DNA Products Meat Rail Insulated Doors have exceptional build quality, robust design and are competitively priced. They are the result of major research and a constantly evolving design effort which has created a world class product. They offer practical and professional solutions to meet door requirement needs in retail and commercial/industrial premises.

### **Hinged & Sliding Versions Available**

### **Chilled & Frozen Temperature Versions Available**

#### **FEATURES**

These doors are manufactured to size, to suit customers exact requirements. The door blades are manufactured using a PIR core. They are capped with silver anodised aluminium section and mounted on a silver anodised thermal broken wrap around frame section to suit various panel thickness.

Our Meat Rail doors can be manufactured with various blade thickness ranging from 80mm, 100mm, 120mm and 150mm, depending on the temperature and specification given by the customer. These doors are suitable for abattoirs and meat processing factories.

## These doors were developed to combine:

- Aesthetics and quality
- Ease of transport and assembly
- Easy maintenance
- Longevity of furniture

## Due to its practical conception in assembly and operation, it is specifically recommended for:

- Butchery outlets
- Estate game larders
- Abattoirs
- Industrial and commercial meat processing applications

## Product Options

- Chiller doors and frames
- Threshold plates and blocks
- Kick Plates and Blade protection
- PVC Strip Curtain

## Servicing

Not only can DNA Products supply new doors but we can service and maintain your existing doors to prevent any unnecessary costs.

We can also repair impact damage caused by forklift trucks. We can assess the safety of the existing products and take measurements for replacement parts.

We will try to match the colour of the existing products or the surrounding area if it is colour coded.
